Professional Summary

Artificial Intelligence & Data Science graduate with practical experience in machine learning, data engineering, and AI application development. Skilled in designing data pipelines, developing intelligent retrieval systems, and building analytics solutions that support data-driven decision making. Proficient in Python, SQL, MySQL, and modern AI technologies, with a strong focus on solving business problems through scalable and efficient data solutions.

Education

B.E. — Artificial Intelligence and Data Science **Nov 2022 – Jun 2026**
Jawahar Education Society's Institute of Technology, Management & Research, Nashik

Technical Skills

Programming	Python, SQL, JavaScript
AI / Machine Learning	LangChain, RAG, Gemini AI, Scikit-learn, Pandas, NumPy, Matplotlib
Data Engineering	ETL Pipelines, Data Warehousing, Data Modeling, MySQL, SQLAlchemy
Tools & Development	Flask, Streamlit, REST APIs, GitHub, Jupyter Notebook, Power BI, Microsoft Excel, HTML, CSS

Experience

Data Science Intern – Softcrowd Technologies **Dec 2024 – Jan 2025**

- Performed data cleaning, preprocessing, and exploratory data analysis on structured business datasets using Python, Pandas, and NumPy.
- Supported machine learning model development through feature engineering, dataset splitting, and performance evaluation using Scikit-learn.
- Developed analytical dashboards and visual reports to communicate core insights and support data-driven decision-making.

Artificial Intelligence Intern – Gamasusco Private Limited **Aug 2026 – Present**

- Contributing to the development of an AI-powered Smart Carbon Accounting Platform for greenhouse gas emissions tracking and sustainability reporting.
- Implementing automated data validation and transformation pipelines in Python to process carbon footprint metrics across diverse operational datasets.
- Enhancing reporting capabilities by calculating environmental metrics and generating structured analytical datasets for downstream dashboards.

Projects

AI Data Warehouse SQL Assistant | [GitHub](#) **May 2026 – Jun 2026**

Stack: Python · MySQL · SQLAlchemy · Streamlit · Gemini AI · ETL Pipelines

- Engineered ETL pipelines processing 5+ retail datasets and loading 10,000+ records into a centralized MySQL database.
- Integrated Gemini AI to translate natural language business questions into precise, executable SQL queries with error-handling safeguards.
- Developed a Streamlit analytics dashboard enabling real-time analysis of 20,000+ warehouse records through natural language queries.

RAG Document Assistant | [GitHub](#) **Aug 2025 – Nov 2025**

Stack: Python · SQLite · Gemini AI · LangChain · REST APIs · RAG Architecture

- Designed and maintained the SQLite relational database schema to record user query histories, document metadata, and session states.
- Collaborated with a 4-member team to construct automated multi-format data ingestion pipelines supporting PDF, DOCX, and CSV files.
- Integrated backend REST endpoints with Gemini AI retrieval workflows to deliver structured query responses and contextual citations.

Certifications

- Python Bootcamp** — CodeWithHarry (Python, OOP, Problem Solving)
- Data Science Certification** — CodeWithHarry (Pandas, NumPy, EDA, Machine Learning)
- Data Analytics Program** — Career365 (Excel, Power BI, Data Visualization)
