Professional Summary

Artificial Intelligence & Data Science undergraduate with a strong foundation in machine learning, data engineering, and Retrieval-Augmented Generation (RAG). Built AI applications that use ETL pipelines and natural language interfaces for querying structured data.

Education

B.E. — Artificial Intelligence and Data Science

Nov 2022 – Jun 2026

Jawahar Education Society's Institute of Technology, Management & Research, Nashik

CGPA: 6.78

Technical Skills

Languages	Python, SQL, JavaScript
AI & Data Science	Pandas, NumPy, Matplotlib, Scikit-learn, LangChain, RAG, Gemini AI
Data Engineering	ETL Pipelines, Data Warehousing, Data Modeling, MySQL, SQLAlchemy
Tools	Streamlit, Flask, GitHub, Jupyter Notebook, Power BI, Excel

Experience

Data Science Intern - Softcrowd Technologies

Dec 2024 – Jan 2025

- Analyzed and cleaned structured datasets using Python, Pandas, and NumPy to prepare data for machine learning and reporting.
- Contributed to feature engineering and machine learning experiments using Scikit-learn, supporting model training and evaluation.
- Created visualizations and shared analytical findings with the team to support project discussions and data-driven decisions.

Projects

AI Data Warehouse SQL Assistant | GitHub

May 2026 – Jun 2026

Stack: MySQL · SQLAlchemy · Streamlit · Gemini AI · ETL Pipelines · Python

- Built ETL pipelines to clean, transform, and load customer, product, and order data into a MySQL data warehouse for analysis.
- Used Gemini AI to translate natural language questions into SQL queries, allowing users to explore warehouse data without writing SQL manually.
- Built a Streamlit dashboard that generated SQL queries, executed them, and visualized analytical results through interactive tables and charts.

RAG Document Assistant | GitHub

Aug 2025 – Nov 2025

Stack: React · Node.js · Express · LangChain · Gemini AI · Prisma · SQLite · JWT

- Built a full-stack Retrieval-Augmented Generation (RAG) document assistant using React, Express, Prisma, and SQLite that answers questions over PDF, DOCX, PPTX, CSV, and XLSX files.
- Combined semantic search, MiniSearch keyword search, and Cross-Encoder reranking to improve document retrieval before response generation.
- Automated document ingestion for six file formats by extracting text, generating embeddings, indexing document chunks, and storing metadata for fast semantic search.

Certifications

- Python Bootcamp** — CodeWithHarry (Python, OOP, Problem Solving)
- Data Science Certification** — CodeWithHarry (Pandas, NumPy, EDA, Machine Learning)
- Data Analytics Program** — Career365 (Excel, Power BI, Data Visualization)
