Professional Summary

AI & Data Science undergraduate with hands-on experience in machine learning, data analytics, ETL pipelines, and data warehousing. Skilled in Python, SQL, MySQL, and AI-powered applications, with experience building end-to-end solutions involving data processing, analytics, and intelligent query systems. Strong foundation in statistics, data modeling, and problem-solving, with a keen interest in data engineering, database platforms, and AI-driven technologies.

Education

B.E. — Artificial Intelligence & Data Science Nov 2022 – Jun 2026
Jawahar Education Society's Institute of Technology, Management & Research, Nashik **CGPA: 7.95**

Technical Skills

Languages	Python, JavaScript, SQL
ML / AI	Scikit-learn, Pandas, NumPy, Matplotlib, LangChain, RAG, Gemini AI
Web & Deploy	Flask, Streamlit, HTML, CSS
Databases/Tools	MySQL, SQLAlchemy, Git/GitHub, Jupyter Notebook, VS Code, MS Excel, Power BI
Data Engineering	ETL Pipelines, Data Warehousing, SQL Querying, Data Modeling
Core Skills	Feature Engineering, Model Evaluation, EDA, Pipeline Design, Query Optimization
Core Concepts	Probability, Statistics, Linear Algebra, Hypothesis Testing, Regression

Experience

Data Science Intern - Softcrowd Technologies Dec 2024 – Jan 2025

- Performed exploratory data analysis (EDA), data cleaning, and preprocessing on structured datasets using Python, Pandas, and NumPy.
- Assisted in feature engineering and machine learning model development using Scikit-learn, contributing to experimentation and model evaluation workflows.
- Created visualizations and summarized analytical findings to support data-driven decision-making and project discussions within the team.

Projects

AI Data Warehouse SQL Assistant May 2026 – Jun 2026

Tech: MySQL · SQLAlchemy · Streamlit · Gemini AI · ETL Pipelines · Python [GitHub →](#)

- Designed and implemented ETL pipelines to ingest, transform, and load customer, product, and order datasets into a MySQL-based data warehouse for analytical reporting.
- Integrated Gemini AI to convert natural language business questions into executable SQL queries, enabling intuitive interaction with warehouse data.
- Developed an interactive Streamlit dashboard supporting SQL generation, query execution, tabular reporting, and visual analytics on structured datasets.

RAG-Based Document QA Assistant Aug 2025 — Nov 2025

Tech: LangChain · LLM APIs · Semantic Search · Python [GitHub →](#)

- Built a semantic retrieval pipeline over a 500+-page document corpus, cutting average user lookup time by ~70% versus manual search.
- Integrated LLM API for context-aware answer generation, achieving a >85% relevant-answer rate on an internal 50-query benchmark.
- Optimised LangChain retrieval chains to reduce per-query latency by 40%, enabling real-time Q&A UX for document-heavy workflows.

Certifications

- Python Bootcamp** — CodeWithHarry (Python, OOP, Problem Solving)
- Data Science Certification** — CodeWithHarry (Pandas, NumPy, EDA, Machine Learning)
- Data Analytics Program** — Career365 (Excel, Power BI, Data Visualization)
