

PRATHAMESH G. TIRMARE

Amravati, Maharashtra | Portfolio | LinkedIn | GitHub
+91 9699246283 | prathameshtirmare246@gmail.com

Professional Summary

AI & Data Science Engineer with hands-on experience in machine learning, data analytics, ETL pipelines, and data warehousing. Skilled in Python, SQL, MySQL, and AI-powered applications, with experience building end-to-end solutions involving data processing, analytics, and intelligent query systems with a keen interest in data engineering, database platforms, and AI-driven technologies.

Education

B.E. — Artificial Intelligence and Data Science

Nov 2022 – Jun 2026

Jawahar Education Society's Institute of Technology, Management & Research, Nashik

CGPA: 7.95

Technical Skills

Programming	Python, SQL, JavaScript
AI & Data	Pandas, NumPy, Matplotlib, Scikit-learn, LangChain, RAG, Gemini AI
Databases	MySQL, SQLAlchemy
Data Engineering	ETL Pipelines, Data Warehousing, Data Modeling
Tools	Flask, Streamlit, GitHub, Jupyter Notebook, MS Excel, Power BI

Experience

Data Science Intern - Softcrowd Technologies

Dec 2024 – Jan 2025

- Performed exploratory data analysis (EDA), data cleaning, and preprocessing on structured datasets using Python, Pandas, and NumPy.
- Assisted in feature engineering and machine learning model development using Scikit-learn, contributing to experimentation and model evaluation workflows.
- Created visualizations and summarized analytical findings to support data-driven decision-making and project discussions within the team.

Projects

AI Data Warehouse SQL Assistant

May 2026 – Jun 2026

Tech: MySQL · SQLAlchemy · Streamlit · Gemini AI · ETL Pipelines · Python [GitHub](#) →

- Designed and implemented ETL pipelines to ingest, transform, and load customer, product, and order datasets into a MySQL-based data warehouse for analytical reporting.
- Integrated Gemini AI to convert natural language business questions into executable SQL queries, enabling intuitive interaction with warehouse data.
- Developed an interactive Streamlit dashboard supporting SQL generation, query execution, tabular reporting, and visual analytics on structured datasets.

RAG Document Assistant

Aug 2025 – Nov 2025

Tech: React · Node.js · Express · LangChain · Gemini AI · Prisma · SQLite · JWT [GitHub](#) →

- Built a full-stack Retrieval-Augmented Generation (RAG) document assistant using React, Express, Prisma, and SQLite to enable natural language question answering over PDF, DOCX, PPTX, CSV, and XLSX files.
- Implemented a hybrid retrieval pipeline combining semantic vector search, keyword search (MiniSearch), and Cross-Encoder reranking to improve retrieval accuracy and generate responses with source citations.
- Developed an automated document ingestion pipeline that parses files, creates embeddings, indexes document chunks, stores metadata, and enables fast semantic retrieval across uploaded documents.

Certifications

- Python Bootcamp** — CodeWithHarry (Python, OOP, Problem Solving)
- Data Science Certification** — CodeWithHarry (Pandas, NumPy, EDA, Machine Learning)
- Data Analytics Program** — Career365 (Excel, Power BI, Data Visualization)
